**KOHLER**<sup>®</sup>  
IN POWER. SINCE 1920.

*SINCE*  
**1920**

**A GLOBAL ICON**  
**NEARLY 150 YEARS**  
**IN THE MAKING**

Founded in 1873 by an Austrian immigrant, John Michael Kohler, Kohler Co. is one of America's oldest and most successful private companies. With its head office in Kohler, Wisconsin (USA), Kohler Power currently operates five facilities throughout the world for designing, manufacturing and installing engines, generators and power supply solutions. Since day one, Kohler has set the standard for design and technology, establishing a global reputation for premium products.

# KOHLER® AND SDMO® OUR STORY

A global force in power solutions since 1920, Kohler is committed to reliable, intelligent products, advanced engineering and responsive after-sales support. Over the years, we've extended our global reach, acquiring SDMO Industries, a worldwide leader known for its high quality generator sets.

Together, we've built on the legacy of two leading brands to create one of the largest generator manufacturers in the world and maintained an unwavering focus on reliable power systems and innovation. Our R&D, manufacturing, sales, service and distribution facilities span the globe, from the Group's home in the USA to Brest, France. And while we've maintained two world-renowned brand names, today KOHLER and SDMO operate as an integrated global organization that's leading the way in design and manufacturing.

We produce integrated industrial power supply systems for a variety of applications (prime, continuous and emergency) in all building types around the world. From datacenters and hospitals to water treatment facilities and government offices. With a deep understanding of your industry, we excel in designing customized power systems that simplify your most complex challenges.

# KOHLER EXPERTISE BENEFITING THE INDUSTRIAL RANGE

KOHLER invests heavily in research and development, with a view to anticipating demand and offering you the most innovative and high-performance energy solutions on the market.

## DESIGN OFFICES USING THE LATEST TECHNICAL INNOVATIONS

The Research & Development cell is home to 140 specialist mechanical, electrical and electronic engineers. The teams are able to anticipate future requirements, and receive ongoing training in the latest 3D modeling, structural calculation, and structural constraints tools, and thermodynamic, acoustic and electrical simulators. This guarantees that the energy solutions you adopt will be at the leading edge of innovation, offering the best performance on the market.

## MODERN FULLY CERTIFIED FACTORIES

- ▶ All of our generators are developed in France.
- ▶ In our extensive premises (over 38,000 m<sup>2</sup>), we have advanced operational equipment, with factories certified to ISO 9001 and 14001.

## A CUTTING-EDGE LABORATORY

- ▶ ISO 17025 accredited since 2009, our “LAB” uses a testing procedure validated and calibrated by COFRAC. It conducts 5 mains types of testing:
  - Thermal balance calculations (cooling)
  - Sound level measurements (measurement method as per Directive 2000/14/EC and ISO 8528-10)
  - Electrical checks (EN 12601-ISO 8528)
  - Project-specific tests (coupling boards), load/shedding impact (standard ISO 8528-5, performance classes G1/G2/G3)
  - Production control (compliance with Directive 2000/14/EC, sourced products, etc.)
- ▶ The laboratory has access to the most advanced tools, with dedicated facilities set over 2000 m<sup>2</sup>, including: a prototype construction area with a 20-ton crane, 3 test benches with control rooms, and a noise emissions area covering 1000 m<sup>2</sup>...

## SERVICES & TRAINING

### WORLDWIDE NETWORK

Distribution sites throughout the world, offering local customer support and technical assistance 24/7. Standardized assistance and spare parts across all our markets.

### GENUINE PARTS

Kohler parts are specially designed for your generator, and are available whenever you need them. We have a vast catalog of parts available through our global network. We supply preventive maintenance kits containing all the parts necessary for scheduled maintenance operations.

### WARRANTY

Kohler guarantees the quality of its products with a standard warranty and an optional extended warranty to protect your investment, reducing the cost of unexpected faults. The equipment is supported by a global network of Kohler-certified distribution technicians, with backup from direct technical support services at the factory.

### GENERATOR TECHNICAL SUPPORT

Trained in the factory, our certified technicians have up-to-date knowledge and diagnostic tools to keep your generator up and running, with fast and accurate issue resolution. Our on-site maintenance engineers will take care of critical installations and any problems you may experience at your premises. We offer a 24/7 technical assistance service.

### TRAINING

Certified technician training delivered by Kohler experts in training centers throughout the world. Training at Kohler training centers and laboratories, and at the distributor's premises or your own site, as required.

## 10 KEY POINTS

# KOHLER®

### OPTIMIZED AND CERTIFIED SOUND LEVELS

Optimized and certified sound levels. Measurements:

- ▶ conducted using acoustic intensimetry (the most accurate method on the market)
- ▶ certified by CETIM (Technical Center for Mechanical Industry)
- ▶ performed in a COFRAC-accredited laboratory (French official accreditation body)

### POWER MAINTAINED EVEN IN EXTREME CONDITIONS

Our engineering department ensures the cooling systems are adapted perfectly, so that maximum power can be provided, even at high temperatures.

### QUALITY TESTING

Each KOHLER generator is prototyped in the laboratory and tested in production, to ensure it operates exactly as it should.

### HOMOLOGATION IN ACCORDANCE WITH THE STRICTEST STANDARDS

KOHLER does not compromise when it comes to the quality of its products and their compliance with standards. They are designed to meet even more demanding criteria than those set by the directives.

### LOW FUEL CONSUMPTION

Our engineers and technicians develop tailored solutions to further improve consumption of fuel and the components chosen for the high performance they offer.

### ROBUST BASE FRAMES AND HIGH-QUALITY ENCLOSURES

A high quality enclosure protects the generator's components whilst enabling it to run under the most extreme conditions (high temperatures, dusty or sandy environments, etc.). KOHLER base frames and enclosures are designed in France, and their suppliers selected according to very strict criteria.

### QUALITY OF THE ELECTRICITY PRODUCED

A high quality current, in voltage and frequency in compliance with the ISO 8528-5 standard, provides a high starting and loading capacity for critical applications.

### SAFETY OF PERSONS AND INSTALLATIONS

KOHLER is developing solutions on a daily basis to further enhance the safety of the generator and its users (modular management of neutral connections, precision circuit breakers, engine preheating, etc.).

### SMALL FOOTPRINT, HIGH PERFORMANCE

The footprint of a generator, in both surface area and volume, is key to ensuring its integration, regardless of space constraints. Thanks to their innovative engineering, KOHLER generators pack big performance into a compact frame.

### REFERENCE IN STOCK ALL OVER THE WORLD

X-PRESS is a range of standard generators stocked across the world, which can be delivered to you within a very short lead time.

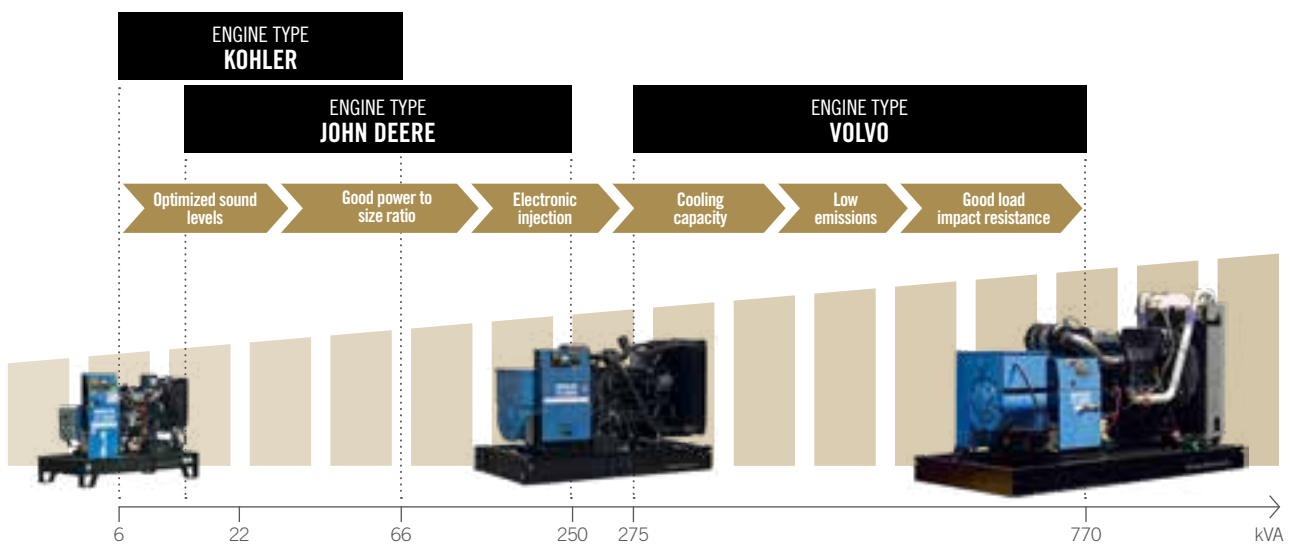

# KD-SERIES AND X-SERIES RANGES: A RESPONSE TAILORED TO YOUR NEEDS

KOHLER offers two different ranges: our KD-SERIES Product range which meets even the most complex requirements, and our highly competitive X-SERIES range, which offers equally high performance.

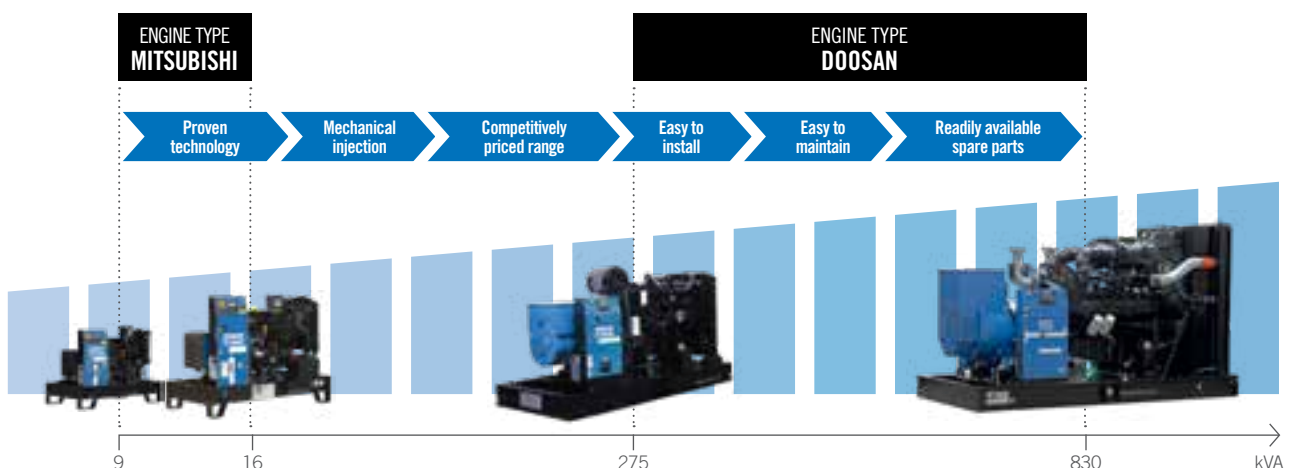

## KD-SERIES RANGE

The KD-SERIES range offers high-tech products that meets the most complex requirements to serve stringent applications such as mission critical segment. These generators offer an optimal power to size ratio and high cooling capacity with controlled sound and emissions levels. These highly robust products can handle load impacts while preserving the quality of the electricity produced in terms of both frequency and voltage.

## X-SERIES RANGE

The X-SERIES range offers a high-quality alternative with competitive products that use proven technology. These generators are configured products which are ready to use right from installation and easy to serve on the field. Their mechanical injection engines and readily available spare parts simplify maintenance operations.

(1) Also available in the following voltages: 415/240 V - 380/220 V - 220/127 V - 200/115 V

(2) Also available in the following voltages: 440/254 V - 220/127 V - 480/277 V

(3) PRP: Main power available continuously with variable load for an unlimited time in accordance with ISO 8528-1.

(4) ESP: Standby power available for emergency use under variable load, in accordance with ISO 8528-1; no overload available under this service.

(5) The dimensions and weights apply to a generator specified in the price list, without options

(6) Dry weight - without fuel

\* ISO 8528: power expressed in accordance with the legislation in force

M: Single phase - H: High speed (3000 rpm) - U: 60 Hz

## BENEFITS

### ▶ POWER AND COMPACTNESS COMBINED

The levels of performance provided by KOHLER Diesel KDI engines ensure our generating sets offer the optimum power to size ratio. This means they can be made more compact, thereby reducing transport and storage costs. For example, KOHLER can now offer a 66 kVA generator in a more compact enclosure (M137). By reducing the footprint, generators up to 66 kVA can be stacked in a 40-foot shipping container.

M: Single phase - U: 60 Hz

► **BASE FRAME WITH 48-HOUR TANK!**

For improved maximum run time, opt for the double wall base frame with a large capacity integrated fuel tank: ideal for isolated areas. This option combines the need for autonomy with security, making it possible for all of the generator's fluids to be held.

**SOUNDPROOFED VERSION**

**J44 DW 48H** ► SOUNDPROOFED VERSION  
with optional 48-hour tank

# THE ENVIRONMENTALLY RESPONSIBLE CHOICE

## KOHLER

### WHAT IS ROHS2 DIRECTIVE?

Directive 2011/65/EU aims to limit the use of certain hazardous substances (lead, mercury, cadmium, etc.) in Electrical and Electronic Equipment (EEE) sold in the European Union\* (as well as Norway, Iceland, Turkey and Lichtenstein).

The purpose is to better manage the dual objective of protecting human health and the environment. This directive, effective since 22 July 2019, relates to mobile generators with no power limit, motorized pumps and static generators up to 375 kW.

### KOHLER'S RESPONSE

To ensure compliance with this directive, all of our suppliers have been contacted in advance by our product Compliance & Certification department to check that their components were compliant.

All products in the industrial range are now compliant with this directive.

### CLEAN POWER RANGE

## REDUCE EMISSIONS, KEEP THE POWER

Do you want to reduce the environmental footprint of your industrial activities for outputs from 12 to 550 kVA? Discover our CLEAN POWER range equipped with low emission engines.

# INDUSTRIAL RANGE POWER FROM A NEW ANGLE

## PLUG & PLAY

**SIMPLE TO INSTALL,  
EASY TO USE**

**INTEGRATED TANK,  
SECURE FILLING**

**QUICK AND EASY  
CONNECTION**

**READY TO USE**

Our design offices have joined forces to optimize the performance of the generators, whilst offering you better ergonomics and improved modularity in a more compact package. The new range now extends from 22 to 250 kVA.

## HIGH QUALITY MATERIALS

- ▶ New European-quality steel with higher corrosion resistance
- ▶ Optimized anti-corrosion properties (no water ingress or stagnation)

## NUMEROUS RESISTANCE TESTS TO ENSURE AN OPTIMUM SERVICE LIFE

- ▶ Enclosures and base frames tested and approved by the French Corrosion Institute
- ▶ Enclosures guaranteed 1500 hours in saline mist (as per standard ISO12944)

## SAFETY OF PERSONS AND PROPERTY

- ▶ Ergonomic access for maintenance and easy connection
- ▶ Base frame with retention bund to protect the environment

## NEW J130: DISCOVER ONE OF THE BEST POWER TO SIZE RATIOS ON THE MARKET

The engine technology and the ability of our design office to develop innovative solutions that maintain efficiency levels in ever more compact generators.

Thanks to the engine performance and the development of the new industrial range, KOHLER presents a 130 kVA generator in the same enclosure as the 88 and 110 kVA generators.

# EQUIPMENT, MODULAR GENERATING SETS; AN ADAPTED RESPONSE

For each of its generating sets, KOHLER offers a large range of options to facilitate maintenance operations, enhance user safety and provide solutions for specific use requirements or unusual environments.

(5) 29 dB(A) and 40 dB(A) silencer available as an option  
(6) Standard on the J220

### ▶ ANALOG DISPLAY OF VALUES

This option enables the oil pressure and the water temperature to be displayed on the APM303 or APM403 screen. In some cases, this is on an additional display.

### ▶ AIR DISCHARGE DUCT

Metal elbow-shaped box section which enables the air to be discharged from the top of the enclosure towards the front of the generator.

### ▶ BATTERY ISOLATING SWITCH

Battery isolator rotary handle for easy isolation of the battery during generator storage.

## 1 PROTECTION OF HOT PARTS

Protective grille for hot parts (exhaust manifold) on the Diesel engine and rotating parts. This option ensures the user's safety during maintenance operations. Mandatory option within the European community (European directive).

## 2 OVERSIZED ALTERNATOR

For installations with significant electrical or climate constraints, this option allows greater operating flexibility for a better guarantee of performance.

## 3 DRAINAGE PUMP

Manual oil drainage pump for easier servicing of the generator during maintenance operations. Standard option on enclosed generators.

## 4 SILENCER ON OPEN VERSION

For "open" version generators, a choice of 3 noise reduction levels is available (9dB(A), 29dB(A), 40dB(A)), to meet the constraints of various installations.

### AUTOMATIC PACK

This includes a preheating resistor and a battery charger. It is an engine preheating device which uses an electrical resistor. Preheating is self-adjusting up to 200 kVA and thermostat-controlled for outputs above this. This option is ideal for generators used as back-up. It allows the coolant to be maintained at a temperature of 40°C to facilitate emergency start-up and save time when commissioning the generator.

## 5 DIESEL SEPARATOR PRE-FILTER

This is a pre-filter enabling water contained in the diesel to be removed, thereby improving the engine's protection.

## 6 FILTER WITH INTERCHANGEABLE CARTRIDGE

Dry air filters with removable and interchangeable cartridges for dusty environments, which can be removed and cleaned with an air gun, if required. This option is required when the generator is used in dusty environments.

## 7 AUTOMATIC FILLING KIT

This is an automatic kit for filling the tank from an external storage tank. It includes:  
- An electric pump with automatic control governed by a gage with level contacts - A manual back-up pump  
Extended use possible without having to top up the diesel. This is particularly well suited for use in isolated areas.

### ELECTRONIC CONTROL DEVICE

Electronic speed regulator with control unit enabling precise control of speed, and therefore the frequency, to +/- 1 %. This regulator is factory fitted as standard on some engines. This option allows the quality of the signal to be improved for better operation of sensitive equipment.

# CONTROL UNITS

## APM303, APM403, APM802: A KOHLER EXCLUSIVE

### KOHLER offers a unique range of specific control units:

APM303, APM403 and APM802. These control units offer a wide range of possibilities, from simplified running to the option of managing the most complex coupling operations, and can be adapted to suit every need.

INDUSTRIAL RANGE	APM303	APM403	APM802
KD-SERIES RANGE Kohler engine	•	X	X
X-SERIES RANGE Mitsubishi engine	•	X	X
KD-SERIES RANGE John Deere engine	•	0*	X
KD-SERIES RANGE Volvo engine	X	•	0
X-SERIES RANGE Doosan engine	X	•	0

• Standard X Not available 0 Optional \* From 66 kVA  
for the solo version and 130 kVA for the coupling version

## CONTROL UNITS

# APM303, THE ESSENTIALS MADE SIMPLE

The APM303 is a versatile unit equipped with a particularly intuitive LCD screen. It offers high-quality basic functions, allowing easy and reliable operation of your generator. This unit is mounted on a console on all generators designed for LV industrial applications with and without a source transfer switch.

### BENEFITS

#### ▶ RS485 SUPERVISION

MODBUS RTU supervision is available as standard via an RS485 link. This link can be configured for the customer's installation.

## FUNCTIONS

- Manual and automatic mode (with auto start input)
- Generator protection and management
- Electrical measurements, including output (option)
- Mechanical value measurements (option)
- Automatic voltage and frequency detection
- Secure configuration on the APM303 or on PC

## CONNECTIVITY

- 2 configurable reports
- MODBUS RTU RS485
- USB port

## OPERATION CONDITIONS

- Front of IP54 controller
- Protection against humidity and dust with tropicalized varnish

## MEASUREMENTS

LCD display examples

▶ Overview display

▶ History and alerts

## CONTROL UNITS

# APM403, INTUITIVE, SIMPLE AND CONNECTED

## DESCRIPTION OF THE APM403\*

## ADVANTAGES OF THE APM403

### FLEXIBLE CONFIGURATION

- ▶ Technical solution can be broken down for multi-configuration – SOLO or COUPLING applications (up to 8 generators)
- ▶ Specific application variables can be customized.

### FLEXIBLE COMMUNICATION TOOLS

- ▶ Remote configuration and supervision thanks to the WEBSUPERVISOR application (optional)
- ▶ Standard communication tools:
  - CAN USB Host, USB device, RS485
  - MODBUS, RTU
- ▶ Optional:
  - 4G, Ethernet, GPRS, Airgate
  - TCP/IP, SNMP protocol

### FOCUS

## ▶ APM403S

The APM403S is dedicated to SOLO operation only. No grid electrical measurements or associated circuit breaker control.

### INTUITIVE NAVIGATION AND SIMPLIFIED GENERATOR OR POWER PLANT OPERATION

- ▶ Multilingual support
- ▶ Simple, intuitive configuration specific to operating scenarios

## CONTROL UNITS

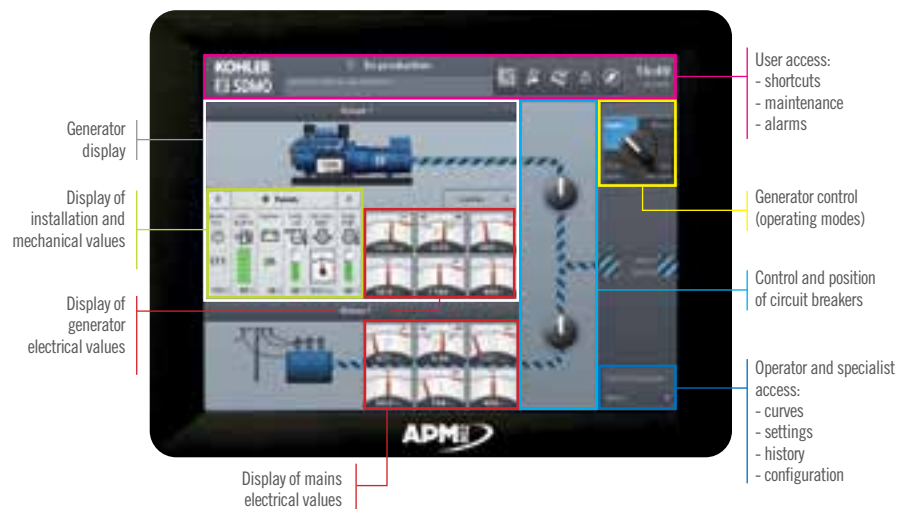

# APM802, DEDICATED TO POWER PLANT MANAGEMENT

### ▶ INTUITIVE AND ERGONOMIC TO USE

The ergonomics of the APM802 has been carefully designed in conjunction with users to ensure optimum user comfort. The operator is guided through how to operate the product according to their access level, making it easy to get started and reducing the risk of errors.

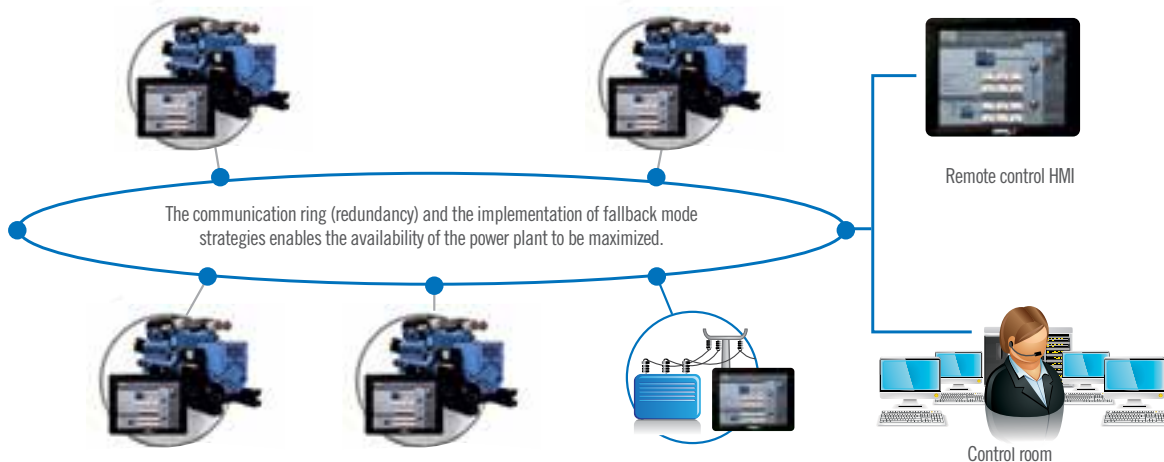

### BENEFITS

Fully developed by KOHLER, the new APM802 command/control system is specifically designed for operating and monitoring power plants for hospitals, data centers, banks, the oil and gas sector, industries, IPP, rental, mining, etc. The human machine interface, created in collaboration with a company specializing in interface design, has a large 100% touch screen to facilitate operations. The pre-configured system for power plant applications features a brand new customization function that complies with the international standard IEC 61131-3.

## THE APM802 FOR ENHANCED COMMUNICATIONS

Communication via the APM802 guarantees a high level of equipment availability and facilitates the remote control of the HMI to enhance its use. Additionally, various connections can be made via the Ethernet, using fiber optics or combined with copper wire. For full control of risk management, the system communications are separate from the external communications.

The ring is created by several Ethernet segments and groups together regulation and PLC communications.

The APM802 can be integrated into a central console, into a built-in control unit, directly on the generator, or in a separate cabinet, to adapt to all installation constraints. An assurance of innovation, the APM802 is protected by copyrights and two patents.

# POWER MODULES

## CENTRAL CONSOLES, AIPR, VERSO

### CENTRAL CONSOLES

Up to 630 A, the power modules are integrated into the central consoles. The extra-flexible cables between the central console and the alternator are fitted in a corrugated insulating sleeve. For motorized versions, the circuit breaker will be directly integrated into the AIPR.

#### POWER MODULE SPECIFICATIONS

POWER OUTPUT	2 POLES	3 POLES	4 POLES
Modular circuit breaker from 10 A to 125 A	• <sup>(2)</sup>	0 <sup>(1)</sup>	•
Fixed unit circuit breaker 160 A to 630 A	X	•	0

(1) As standard for some neutral connections  
 (2) Only for single phase generators  
 • Standard X Not available 0 Optional

### AIPR

Above 630 A, power modules called AIPRs are separate from the control/command section. These control boxes are fitted on the generator base frame and connected to the alternator.

AIPR	
With manual control on the front panel	
3-pole open circuit breaker	•
4-pole open circuit breaker	0
Motorized control option*	
With 3-pole circuit breaker, open type	0
With 4-pole circuit breaker, open type	0
Other specifications	
Power connection bus bars	•
Protection rating	IP23

\* The motorized control comprises: a closing electromagnet, a transmitting coil and an AC motor  
 • Standard 0 Optional

### VERSO

In industrial applications, the transfer of the main source to the replacement source is crucial to the running of your installations. The Verso is the perfect solution for this requirement: **from 35 to 160 A, the Verso 100 and 150D, and from 200 A to 3200 A, the Verso 200.**

# X-PRESS RANGE

## STANDARD GENERATORS HELD IN STOCK

Thirty 50 Hz models from 9 to 830 kVA and twenty-six 60 Hz models from 9 to 750 kW in the industrial range are held in stock around the world and can be delivered to you within very short lead times. These generators are available in open or enclosed versions. Aftermarket options are available to order (silencers, differential protection, normal/emergency switches, Service First, etc.).

### ► ORDER DIRECTLY BY MAIL

You can place your order directly by mail using the form attached to the stock list sent each week. Cut out the middle man: your order is registered and shipped in the quickest possible time.
